Senior Wellness Packages

Base price only \$132.77!

We appreciate the lasting bond that owners have with their pets. In order to assist you in lengthening that relationship as long as possible, our Senior Packages includes essential testing to keep your pet going well into its golden years. Catching problems early through regular health screening can assist in detecting disease early – making treatment often more successful and affordable. The American Animal Health Association (AAHA) recommends physical exams every 6 months to optimize the health of your pet and promote a longer, healthier and active life! Our Senior Package includes:

- **A Physical Exam:** A comprehensive physical to evaluate the general health of your pet. This exam will also allow us time to discuss over all health issues such as obesity, arthritis, cataracts and behavioral changes.
- **Nutrition Evaluation:** Premium nutrition through a senior diet or weight reduction food is essential to older pets.
- **Dental Care:** Dental disease can cause problems for internal organs. Your veterinarian will evaluate your pet's mouth for disease and assist you with a preventative health plan.
- **Blood, fecal and urine testing:** A comprehensive Total Body Function test will check your pet's kidneys, liver, thyroid, electrolytes and red and white blood cells. We also include a fecal to screen for parasites and a urinalysis to check for crystals, infections and kidney function.

Additional items available at 15% off with your Senior Wellness Visit:

- Vaccinations
- X-rays – for screening of arthritis and organ changes
- Eye Pressure testing for glaucoma
- Blood Pressure testing for kidney function and hypo/hypertension
- Heartworm Testing
- Feline Leukemia and Immunodeficiency Virus testing

PLEASE NOTE: All diagnostic testing must be performed the day of the physical exam

for the applicable 15% discount. Payment is due upon the day of service.
